Multiple Programming Languages: how it is put together

sketched from the finish

Multiple Programming Languages: the run, step by ste

If a step fails, the honest run says so and stops.

traced, not guessed, OK

Product map: what Multiple Programming Languages is for

WHAT IT IS

A small project in Notebook, Rust, HTML. The README and the files are the whole claim.

WHAT GOES IN

The files at the top of the tree: jupyterNotebook.ipynb, rust.rs, html.html.

WHAT COMES OUT

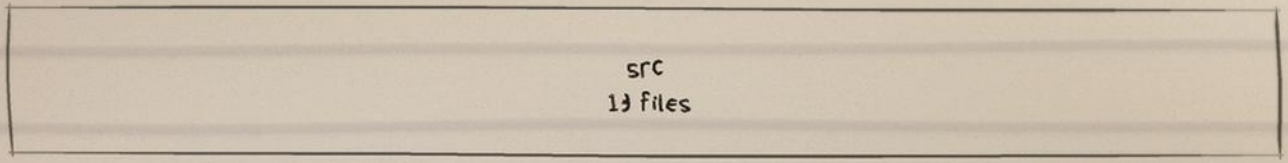

What the top files produce when they run or get read. Nothing else is promised.

WHERE IT STOPS

No service behind it, no account, no upload. If a path is untested, VISUAL.md says so.

mapped by hand, 

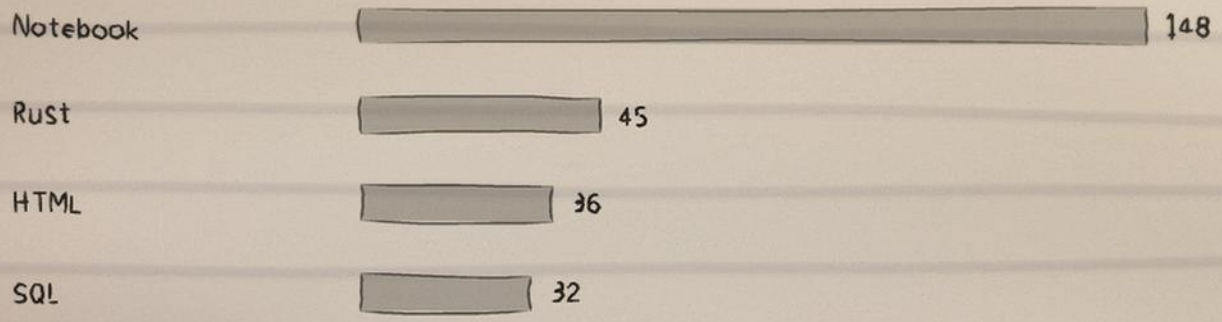

Multiple Programming Languages: the parts and their jobs

Each part is a folder or a file that is really in the tree.
If a part is only a name in the README, it is not drawn here.

Multiple Programming Languages in numbers, counted 2026-10-30

Counted from the local snapshot of this repo. Method for every number: VISUAL.md.

14 files in the tree.
18 commits, first 2024-09-27, last 2024-09-27, from the local git log.
No test files by name in this snapshot.

counted and drawn, GK

Multiple Programming Languages: schematic of the apparatus

the system as a machine: parts, flow, and measurements

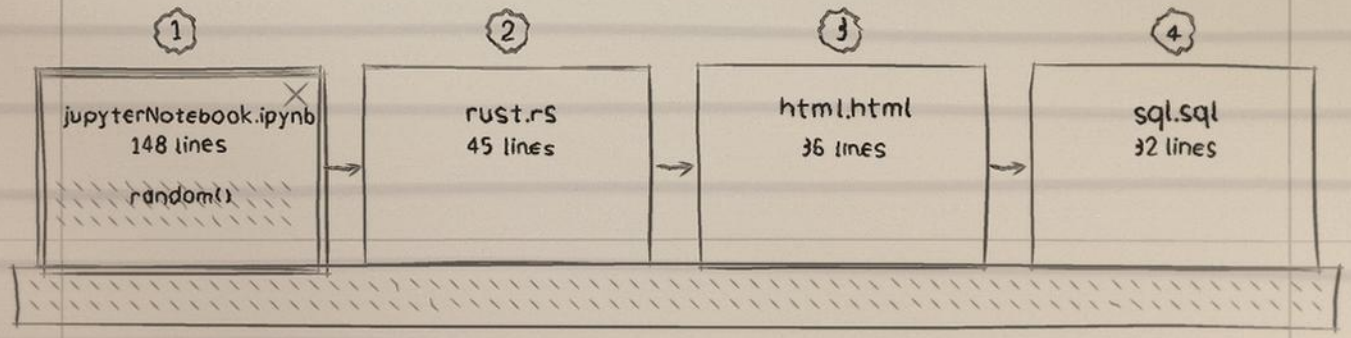

construction lines left in, as drawn

parts list

1. jupyterNotebook.ipy.
2. rust.rs
3. html.html
4. sql.sql

in flow order, first to last

housed in: src

base plate: the repo itself, sectioned

span: 14 files, 321 lines counted

turns of the crank so far: 18 commits, 2024-09-27 to 2024-09-27

measured and sketched, GK
